## INTERACT, PLAN, FIND SUPPORT & SAVE

START THE TOUR

### STEP 1: INTERACT WITH US

Tell Us about your home and we'll Tip You our "dollars & sense" energy efficient living advice, while you interactively create a customized plan to start saving energy and money.

### STEP 2: CREATE YOUR PLAN

Review your estimated energy costs of living and your home energy improvement plan of actions based on your responses to our interactive tour from Step 1.

### STEP 3: FIND HELPFUL SUPPORT

Find helpful support from our extensive home energy education library and read advice on how to select a good contractor, when to apply for financing, and where to search for incentives.

## Your Potential Energy Savings \*

**\$ 1579** Current Estimated Energy Costs (\$/Year)

**\$ 1171** Post-Upgrade Estimated Energy Costs (\$/Year)

**\$ 408** Potential Energy Savings (\$/Year)

[Print Report](#)

## Your Available Home Improvement Incentives

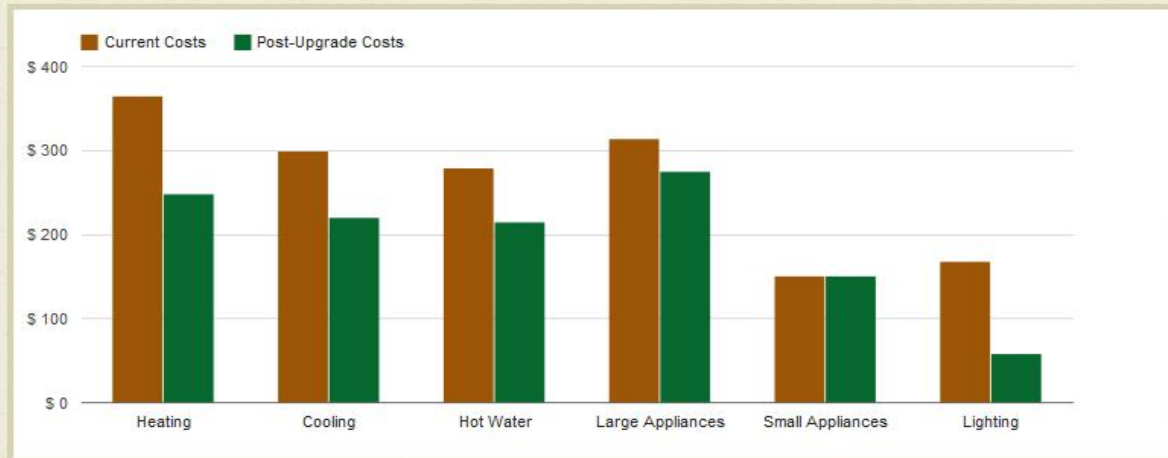

Your Utility:

Utility Homepage?  Yes

Rebates?  Yes

Financing?  No

Audit Services?  Yes

\*This is only an estimate of your potential energy savings. Home performance is a result of both building systems, as well as, occupant behaviors. As such, every home is unique and your actual energy consumption and costs may vary from our estimate. We encourage you to compare our estimate with your last 12 months of utility bills. If your actual combined energy costs (e.g., electricity, natural gas, propane) are higher than our estimate, then your "Potential Energy Savings (\$/Year)" may be even greater. However, if your actual costs are lower, then your savings are likely to be somewhat less. You should not make any decision based on any of the information presented on, or linked through, this web site without undertaking independent due diligence. Consider asking your local utility for a simple home energy audit (if they offer one) or hiring a certified Home Energy Rating System, Building Performance Institute, or Home Score Rater to evaluate the performance of your home.

Improvement Type	Potential Energy Savings By Type (\$/Year)	Improvement Details	Improvement Rebates
Attic Insulation	\$120	<b>Ceiling insulation costs:</b> R-19 : \$26 to \$109 R-30 : \$41 to \$168 R-38 : \$52 to \$216 R-49 : \$67 to \$276	<input checked="" type="checkbox"/> Yes
