

Sustainable Construction Research and Education Initiative

SCREI at FIU is a joint initiative with participating faculty and students from [Engineering](#), [Computer Science](#), [Construction Management](#), [Architecture](#), [Entrepreneurship](#) and [Applied Research Center \(ARC\)](#), dedicated to advancing knowledge in

sustainable building construction through research, education and outreach activities and providing technical assistance to industrial and business partners.

Sustainable Construction Certificate Program

This interdisciplinary Professional Certificate provides both traditional students and practicing professionals with a unique learning experience that enhances their design and management capabilities in the emerging field of sustainable building design and construction. The program focuses on an integrated system approach to apply basic engineering science/architectural principles to practical applications through interdisciplinary teamwork. Interested applicants must contact the Program Coordinator prior to registering for the program.
