

PENSACOLA STATE
COLLEGE

This program is designed to acquaint the student with terminology, methods, procedures, materials, sequences of operation, and types of building construction. This program is not intended as a transfer program, and only a few program specific credits may transfer to upper level programs in Engineering Technology. Additional general education course work will be required for transfer students.

Contact [PSC Continuing Education](#) for information on the following continuing education courses being offered during the 2010-2011 Academic Year:

Green Building Basic: LEED Core Concepts and Strategies	12 Hours
LEED for Contractors	6 Hours
Principles of Green Buildings	30 Hours
