

VALENCIA

Associate of Science and Certificate in Building Construction Technology

Program Description:

Construction is one of the fastest-growing professional fields in Central Florida, and an A.S. degree in Building Construction Technology from Valencia can get you into the game. This program will give you the skills to work with the best architects, engineers, contractors and building officials in the business. Potential careers include: Construction Estimators, Schedulers, Superintendents or Managers, Building Inspectors, Plans Reviewers, and Project Engineers or Managers.
